Why Orlaco?

Welcome to the Orlaco product catalogue. We are personally committed to bringing you the best camera and monitor solutions possible. To help create safer and more secure workplaces around the world. Our professional team has spent over twenty-five years designing and manufacturing a variety of certified, reliable and complete camera display solutions that effectively eliminate the blind spots around vehicles, machinery and vessels. We are confident that the options offered in this catalogue will not only help you to improve the safety, security and efficiency of your fleet, but also to enhance the ergonomics and comfort for your operators. That is what Orlaco stands for. We invite you to share your ideas and experiences with us.

That's
why!

Let us
improve
your every
day job

Certified
Quality

Emergency vehicles are complex machines that require clear vision which allows the operation to progress smoothly and safely. Especially when an emergency attracts a large audience and or press, maneuvering into a correct position is not an easy task. Drivers have minimal vision around the vehicle. It is essential to solve large blind spots in a professional matter. This is where Orlaco's camera monitor solutions will help to improve operational efficiency and safety. Together with our zoom and/or thermal imaging cameras on the basket, analyzing the overall situation will go much faster and efficient.

A driver of an emergency vehicle is required to follow what is occurring around his vehicle. Frequently he must maneuver into a contorted position. The vehicles are reversing repeatedly. The driver is obliged to turn his body to overview the operation, possibly leading to short or even long term ergonomic injuries. By viewing the Orlaco monitor located on the dashboard, the driver can maintain correct posture and work more comfortably. He feels safe, secure and in control of the vehicles' environment, reducing stress and providing comfort.

At Orlaco, quality is never taken lightly. We keep a clear and persistent focus on customer satisfaction. A focus that is maintained throughout the manufacturing process of our quality products, which are custom designed in various formats. We are able to uphold our level of quality by providing detailed servicing. To top it all off, we have secured the highest achievable automotive certification: TS16949. At Orlaco, we invest in continuous improvement in order to secure a long term, satisfied customer base. We believe that compatibility in products, systems, and operations is the key element to creating reliable partnerships. All our products are controlled and clearly documented to give our customers a zero-defect product with operation that works right, every time.

Why Orlaco

Why Orlaco

Emergency sight solutions

Cage-cam

CC2002 - PAGE 15

CC1002 - PAGE 14

Aerial appliances or ladder trucks are used to provide the most effective location possible for extinguishing fires. This has one disadvantage: It is difficult to follow operations from the ground. The safe and effective use of the aerial appliance or ladder truck therefore depends on the viewing system. Orlaco can help you get the best possible view using a camera system.

Frontview

0400511 - PAGE 19

The new EU mirror directive came into force in 2006 and was extended in January 2007. It includes frontview mirrors for all new trucks in Europe. Only an approved camera system may replace the front view mirror. The front camera provides a perfect view of the blind spot in front of the cab. This makes it possible to notice cyclists and pedestrians in time.

Vision solutions

Mastcam

MC1101 - PAGE 14

Being able to see the people working in the basket cannot be taken for granted, especially if you are working above or behind high buildings or objects where the basket will be out of sight. With the mast camera, you will always be able to see them. That is a prerequisite for wellcoordinated collaboration and maximum safety.

Rearview

0401861 - PAGE 19

The rearview camera helps you get your vehicle into the correct position quickly and safely. Especially when reversing, you enjoy improved and increased field of view. This is more efficient for you and it can improve safety for bystanders. **Recommendation:** Add RadarEye to increase safety & efficiency. (see page 24-25)

Vision solutions

Rearview
DEVS SETS - PAGE 16-17

The rearview camera lets you see the area immediately behind the crash tender. This is safer when you are on the way to the location and ideal when you are moving your vehicle into position.

Runway-cam
DEVS SETS - PAGE 16-17

With the camera system recommended by the Federal Aviation Administration (FAA) (AC No: 150/5210-19A), consisting of a thermal imaging camera and a zoom camera on the roof of the vehicle, you can fight fires more effectively as a result of your improved field of view. In addition, you can record these images digitally with the integrated recorder. That can be an important function when analyzing the disaster. This set is also fitted with rearview and sideview cameras.

Sideview
DEVS SETS - PAGE 16-17

Given the dimensions of the crash tender and your position as the driver, adequate view is not something you can take for granted. The side cameras provide greater vision of the areas to the sides of the vehicle.

Information

Crash tenders are large, cumbersome vehicles. An Orloco camera system is a welcome addition. You can easily combine this with a thermal imaging camera and a zoom camera. These DEVS (Driver's Enhanced Vision Systems) for ARFF (Aircraft Rescue and Fire Fighting) are recommended by the FAA. Two cameras are positioned on the Pan & Tilt unit. The zoom camera, capable of up to 432X zoom, lets you see the

location and brings objects into crystal-clear focus. The thermal imaging camera helps you see through the smoke to localize the seat of the fire. You can view the images from both the zoom and thermal imaging cameras and the side- and rearview cameras on the monitor in the cab.

Frontview- TIC

FF1001 - PAGE 18 

Fighting a forest fire is a tough job. Accessibility is limited and unclear especially when combined with heavy smoke development. Using a thermal imaging camera on a Pan & Tilt unit on the front of the vehicle, together with a rearview camera, helps you to better overcome these obstacles.

Rearview

 0401861 - PAGE 18

Orlaco equips your forest fire engine with a rearview camera. This camera provides you with a view of the area directly behind the vehicle. This allows you to reverse more safely, not only in traffic, but also in forest areas, which are often difficult to access.

Rearview

The rearview camera increases the safety of professional response personnel and bystanders. You can maneuver more easily because you can see the area behind the vehicle. The monitor in the cab automatically switches over to the rearview camera if you select reverse gear.
Recommendation: Add RadarEye to increase safety & efficiency. (see page 24-25)

CornerEye

CornerEye offers a complete and detailed view of 270° of the area around the cabin. The system delivers HD digital image quality in real time.

International responder

Combination set

Front- and Rearview
0401861 - PAGE 20

INFORMATION

The frontview mirror may be replaced by a front camera provided it meets, among others, the following requirements:

- Mandatory front vision at forward speeds of between 0 and 10km per hour.
- It must be possible to see the class VI field of vision. (2m in front of and 2m across the entire width of the cab)

- The monitor may only display the class VI field of vision at forward speeds of between 0 and 30km per hour.
- The monitor and camera must meet all technical requirements.

The EG*2003/97*2005/27 directive describes the specifications that a truck's mirrors must comply with. Orlaco's front view system meets all these requirements.

4. Multi cable 16m
0301920 - page 34

Note: Example of design, contact Orlaco for the required cable lengths.

Surround view

- Surround view can be applied on any type of vehicle.
- Increased view when manoeuvring in narrow spaces and crowded areas.
- Images available: 180°, 270° or 360°.
- Surround view offers an overview of objects and people around a vehicle. They are always visible, thanks to overlapping camera images.
- Suitable for both 7" and 12" Orlaco monitors.
- Operating temperature between -40° and +85°C.
- A maximum of four different overviews can be programmed.
- No time-consuming calibration of cameras.
- Surround view can be designed and programmed in accordance with the customer's wishes.
- Contact Orlaco for more information and advice.

The dimensions and design of emergency vehicles make it difficult for a driver to have a complete overview of the situation. Surround View gives a three hundred and sixty degrees field of view around the vehicle, enabling the driver to maneuver safely under the most difficult and hectic circumstances. The positioning of the vehicle is often essential in order to attend to emergency situations on time in a safe and efficient way. The system shows a maximum view of all four sides of the vehicle on one monitor. The camera images overlap, allowing the driver to have a complete overview at all times, without missing any obstacles. By providing the driver an immediate clear overview of the situation, Surround View significantly increases safety and efficiency.

Forward manoeuvring

Reverse mode

CornerEye covers field of vision Class V & VI with one camera

- HD camera and 10" HD monitor
- 270° field of vision
- Real time: zero latency
- Shock and vibration proof
- Ruggedized design
- Designed to comply with automotive requirements
- Camera IP69K watertight
- Short mounting time
- Custom made bracket per brand on request

Get excellent view on blind spots around trucks with the revolutionary new CornerEye camera monitor system. Ultimate digital technology and effective application come together in this unique vision system. The system has a wide angle lens that, combined with the latest technologies, delivers a field of vision of 270°. CornerEye covers the obligatory Class V & VI and even beyond, increasing your vision.

0400040 Set CornerEye

- Including HMOS camera with bracket, 10" monitor with A pillar bracket and 3m digicoax cable.

CornerEye Parts

0185610 Set HMOS camera with bracket

- Including camera HMOS 180°

RadarEye unites visibility and active detection

Orlaco has developed this radar unit in addition to the camera-monitor systems. By combining the vision solution with an active signaling system, RadarEye offers additional safety and efficiency.

RadarEye is an integrated active view system designed to detect and see objects in zones obscured from the operator's view. The radar system detects stationary as well as moving objects in a designated coverage area. With this view system the operator is actively warned with audible tones that increase in rate as objects come closer. When an object is detected it can be seen on the monitor and the operator can respond immediately. This prevents damage to the operators machine and any other equipment he may reverse into. The radar units have a rugged design, are shockproof, waterproof and is not influenced by the environment, such as snow, rain, mud and or temperature changes.

- RadarEye can be used on various trucks
- RadarEye is capable of visualizing the radar-zones on the display, as soon as a person enters the zone it will activate colored dots (default setting) or a transparent visualization (standard/custom preset settings) to make the driver aware of the potential danger
- 2...20m detection area, divided in 5 equally sizes segments
- Separation distance: 1-4m (configurable)
- Antenna beam horizontal: 70°(typ.), vertical: 11°(typ.)
- Operating temperature between -40°C to +85°C
- Obstacle reaction delay 50ms
- Orlaco Monitor CAN SRD is required
- RadarEye can be extended with multiple sensor and camera units for all around detection and visibility
- Please contact Orlaco for advice and installation

You Tube

RadarEye Sets

- 0403120 Set SRD Corner Rear**
Active Rearview system for corner mounting.
- Including SRD sensors, brackets and terminator
 - Interface Box CAN/SRD/camera is required (0256010 or 0504820)
 - Cables, camera and monitor CAN SRD are not included

- 0403100 Set SRD Center Rear**
Active Rearview system for center mounting.
- Including SRD sensors, bracket, cable master-slave (0301080) and terminator
 - Interface Box CAN/SRD/camera is required (0256010 or 0504820)
 - Cables, camera and monitor CAN SRD are not included

RadarEye Interface boxes

0404700 Interface Box for non-Orlaco display
The Interface Box is designed to connect SRD sensors to camera, other monitor (non-Orlaco or Orlaco NON-CAN) and external speaker..

0256010 Interface Box CAN/SRD/camera
The Interface Box is designed to connect SRD sensors to camera and CAN SRD monitor.

0504820 Interface Box with Ext. speaker CAN/SRD/camera
The Interface Box is designed to connect SRD sensors to a camera, CAN SRD monitor and external speaker.

- Set consists of: External speaker and Interface Box
- Sound pressure speaker: 85dB (+/-3dB) distance 1m

0404700

RadarEye Cables

- Cable M12 Green**
Connection cable between Interface box and master SRD sensor or connection cable between slave SRD sensor and next SRD sensor.

RadarEye Brackets

0401330 Bracket SRD Sensor Corner Rear
Mounting bracket for SRD Sensor for corner mounting.

- Stainless steel
- SRD sensor not included

0401320 Bracket SRD Sensor Center Rear
Mounting bracket for SRD Sensor for center mounting.

- Stainless steel
- SRD sensors not included

The specs of our HMOS Digicoax cameras

- High resolution CMOS rolling shutter
 - 1280 x 960 video image
 - Light sensitivity 0.1 lux
 - Excellent impact- and vibration-resistance
 - Improved EMC-standards
- Automotive molding-filled housing, watertight IP69K according to DIN 40050-9
 - Operating temperature between -40°C to +85°C
- IP68 dust- and waterproof according to IEC 60529
 - The camera has a 0,5m cable including a digicoax waterproof molded 4p male connector

Cameras HMOS

Compact, industrial high definition digicoax camera.

0311080	16m	0311090	21m

Digicoax switcher

Input and power supply for a maximum of 4 Digicoax HMOS cameras.

- Cameras can be switched over automatically with a HLED MR1 monitor

0404240 Switcher Digicoax - 4 channel

Or design your system yourself

- Step 1:** Select your camera

Step 2: Select your desired cable

Step 3: Select your monitor

Step 4: Select the required options

It is also possible to configure your system online on our website: www.orlaco.com

Whatever you select, the system can be easily installed and is plug-and-play.

Note: For two or more cameras a switcher, 4Cam RLED Monitor or MultiView Box and additional cables are required. Contact us for support.

The qualifications of our FAMOS Compact Cameras

- Next generation CMOS sensor
 - Light sensitivity 0.05 lux
 - Integrated *Safety ticker* to show that camera is running and active
 - Operating temperature between -40°C to +85°C
 - Heated lens glass, therefore no
- problems with condensation or frost
 - IP68 dust- and waterproof according to IEC 60529
 - The camera has a 0,5m cable including a waterproof molded 4p connector male
 - Automotive molding-filled housing,
- watertight IP69K according to DIN 40050-9
 - Improved EMC-standards
 - Optimized impact- and vibration-resistance

Johnson's Criteria

The Johnson's criteria defines what is meant by "seeing a target". The minimum required resolution according to Johnson's criteria are expressed in terms of image resolution across a target, in terms of several tasks: Detection (4px), Recognition (16px) and Identification (26px). The measurements are based on optimal conditions with an object size of 2.3m x 2.3m and are theoretical. Practical situations may deviate.

- UV-transparent front cover

Mounting means

0402320 Protective cover

Cover specially designed for the Compact Camera.

- Stainless steel housing

Camera extension brackets

Specially designed for the Compact Camera. Matches the hole pattern of the Compact Camera bracket.

- Stainless steel

0402250 Camera extension 155mm

0402270 Camera extension 250mm

0401270 Camera bracket

Compact bracket specially designed for the Compact Camera.

- Cap can be resprayed in the color of the vehicle
- Including mounting kit
- Compact Camera is not included

0403310 Shock-absorbers for Compact Camera

In situations where shock absorption plays a major role, we recommend that the specially developed shock absorbers are used when installing the Compact Camera.

0403400 Magnet Bracket Compact Camera

For quick mounting of Compact Camera on steel profiles.

2015500 Adjustable mounting bracket

- Length 132mm

2015600 Adjustable mounting bracket

- Length 190mm

The qualifications of our zoom cameras

- Operating temperature between -40°C to +85°C
 - Built-in brightness function to ensure better view on dark areas
 - 480x zoom, 1,6° to 48° horizontal opening angle
- Built-in night vision function (0 lux mode)
 - Nitrogen-filled housing, 100% watertight (IP 69K)
- Heated lens glass, therefore no problems with condensation or frost
 - Shock and vibration resistant

AF-Zoom Cameras

- Power supply 12V - 24V/DC when cable is <50m
Power supply 18V - 24V/DC when cable is >50m
- 2,6kg
- Dimensions: 260x140x122mm (without bracket)

0103532 AF-Zoom Camera Serial PAL

- Including 6m multi cable fitted with 7p connector (female)

0103532 AF-Zoom Camera Serial NTSC

- Including 6m multi cable fitted with 7p connector (female)

0103811 AF-Zoom Camera Aluminium HD-E

- Including 5m ethernet cable

0103512 AF-Zoom Camera Hard wired PAL

- Including 10m multi cable (1220250)

Thermal Imaging Camera

- Thermal Imager Uncooled VOx microbolometer
- 25° lens (up to 450m detection)
- 12-30V/DC max 8W
- 2x and 4x zoom

0103732 TIC-camera 320 9Hz

- Including 6m multi cable fitted with 7p connector (female)

The qualifications of our Pan & Tilt Zoom Cameras (PTZ)

- Operating temperature between -40°C to +85°C
 - Built-in brightness function to ensure better view on dark areas
 - 40x optical zoom, 1,6° to 48° horizontal opening angle
 - Built-in night vision function (0 lux mode)
- Nitrogen-filled camera housing, 100% watertight (IP 69K)
 - Heated lens glass, therefore no problems with condensation or frost
 - Shock and vibration resistant
 - Dimensions: HxWxD 284x307x141mm
 - Including 5m cable with 7p connector
- 6 presets for camera positions
 - Pan angle 360° (180° to left, 180° to the right)
 - tilt angle 180° (90° up, 90° down)
 - Pan & tilt speed 12,5°/sec
 - Power supply 18V to 30V/DC

Pan & Tilt Zoom Camera

- Aluminium housing
- Weight: 5kg (including 5m cable)

0506953 PTZ Camera Aluminium PAL

0506962 PTZ Camera Aluminium NTSC

0506811 PTZ Camera Aluminium HD-E

Pan & Tilt Thermal Image Camera

0506972 PT TIC Camera Aluminium PAL

The possibilities offered by Orlaco LED monitors

- Automotive 7inch TFT liquid crystal display module, LED backlight
 - Operating temperature between -40°C to +85°C
 - Impact and vibration resistance meet the stringent requirements
 - High resolution pixel WVGA 800xRGBx480
- Power protected against:
 - Induction voltages
 - Load dumps
 - Over- and undervoltage
 - Mirror image setting
 - Brightness automatically adjusts to the ambient light
 - Integrated sun visor
- Option of a marker line per camera on the screen for the optimum determination of distance
 - IP67 according to IEC 60529
 - Full On-Screen-Display (OSD) in 12 languages
 - Watertight molded connectors
 - Open wired power cable

Monitors RLED 12"

0400610 Monitor mounting bracket
For assembly of the Monitor 7" LEDD.

- ABS + aluminium

0400600 Monitor mounting bracket flexible
For flexible assembly of the Monitor 7" LEDD.

- ABS + aluminium

The advantages of Orlaco cables

- All cables are specially developed by Orlaco
- Special cables are available for various circumstances such as severe off-road conditions
- Resistant to oil and petrol
 - Watertight cable connectors
 - Operating temperature -40°C to +85°C

Multi cable standard

This standard cable can be used if no special requirements like mechanical protection or dynamic movement of the cable is needed.

Including 4p molded connectors:

0301960	1m	0301870	2m
0301890	3m	0301880	5m
0301910	7,5m	0301930	8m
0301950	9m	0301900	11m
0301920	16m	0301940	21m
0301990	40m		

Including 7p molded connectors:

0304420	0,5m	0302820	1m
0304260	2m	0304410	6m
0304610	11m	0304620	16m
0305030	21m		

Cable per metre (connectors not included)

1220170	Multi cable 1x coax + 5x wire
1220250	Multi cable 1x coax, 12x wires PUR
1220280	Multi cable armored 1x coax, 5x wire
1220350	Multi cable 2x coax + 5x wire PUR
1220900	Power Multi cable 7x wire AWG20
1222000	Coaxcable 75 Ohm RG50

Any required connectors can be ordered separately (page 31).

Connectors

1310841 Connector 4p female Gold
• Recommended for multi cable

1312001 Connector 4p male Gold
• Recommended for multi cable

1310850 Connector 4p female PG9 Gold
• Recommended for dynamic and armored cable

1312050 Connector 4p male PG9 Gold
• Recommended for dynamic and armored cable

1311201 Connector 7p female Gold
• Recommended for multi cable

1322401 Connector 7p male Gold
• Recommended for multi cable

1311250 Connector 7p female PG9 Gold
• Recommended for dynamic and armored cable

1322450 Connector 7p male PG9 Gold
• Recommended for dynamic and armored cable

1310861 Connector 8p female Gold
• Recommended for dynamic and armored cable

0306680

Interface cables

To connect an Orlaco MIRROR Compact Camera to a third party monitor.
Note: with sideview camera always use adapter cable in combination with 0404300 Switcher 4Cam. Visit www.orlaco.com for a complete overview.

- 0303770 Adapter cable 4pF - Cinch / power wires
(Iveco Connect rearview, Alpine, Pioneer, Kenwood, JVC, Trimble, TomTom, Garmin Fleet 670V)
- 0303860 Adapter cable 4pF - BNC
- 0304060 Adapter cable 4pF - 3,5mm Jack plug
(Snooper 7000/8000/8500, Mercedes Telematics-Fleet board dispo pilot II, TomTom Bridge pro 827x)
- 0308430 Adapter cable b4F - 2,5mm Jack plug
(Snooper 5700/5800/6400/6800/8100)
- 0304990 Adapter cable m4F
(Volvo FH 4 / FM 4 SID High, Renault T 6YR02)
(1 adapter cable per camera, up to 4 camera's possible)
- 0303090 Adapter cable 4pF - Bosch
(MAN/DAF/SCANIA) radio
- 0304870 Adapter cable m4F - r4M MAN MMT Monitor
(For vehicles with camera preparation 351LZ)
- 0308400 Adapter cable MAN MMT.2 / 2016 - r4M m4
(For vehicles with camera preparation 351 MA/MC/ME/MF)
- 0308410 Adapter cable MAN MMT.2 / 2016 - r4M RA m4F
(For vehicles without camera preparation)
- 0306980 Adapter cable r4F - m4F Scania Premium radio next generation
- 0308440 Adapter cable b4F - 3,5mm Jack plug
(Garmin Truck navigation DEZL770 LMT)

Mercedes interface cables

Note: The monitor automatically switches to rearview when reversing. Additional cameras require manual switching (on steering wheel or radio) from navigation to camera view.

- 0304660 Adapter cable 4pF - Mercedes-Benz radio/navigation
(For 7" multimedia system without camera preparation)
- 0306680 Adapter cable b4F - HMI Fakra Male b4F
(For vehicles with camera preparation J9J in combination with an instrument-display or multimedia system)

Cable disconnection sets

- 0351070 7p 6mm cable
- 0351090 7p 9mm cable
- 0351130 13p

- Watertight
- With caps

- 0351100 10p harting set
- 0351160 16p harting set

- Watertight
- With caps

Interconnection cables

- 0304020 Cab cable

- 1 x coax + 5 x wire PVC Ex
- Including 4p molded male connector & 10p harting female
- Operating temperature between -40°C to +85°C

- 0303630 Spiral interconnection

3,5m spiral cable between tyre carrier and adjustable bumper.

- Oil and petrol resistant
- With double coax
- Including 10p harting plugs

- 0303740 Cable trailer

- 25m multi cable
- Including 4p molded female connector
- Including 10p harting male

Multiview boxes

The MultiView box II is an advanced video imaging system for up to 4 cameras. There are many possibilities of different split views in 5 selectable video channels.

- Stainless steel housing
- A MultiView box II can only be connected to an Orlaco Serial Monitor. Or via the Serial Cable 6m (8976330) when a non-serial monitor is used

0405100 MultiView box II

- 4 camera inputs (4x Compact Camera)

0405110 MultiView box II, serial

- 4 camera inputs (3x Compact Camera 1x AF-Zoom Camera)

Preset view options for channel 1-4:

Default channel 5:

0404300 Switcher 4Cam

This video switcher for third party monitors has 4 video inputs and 1 video output

- Connect up to 4 cameras (PAL or NTSC) to a third party monitor (only applicable for third party monitors)
- Including 3,85m power cable

Digital video recorder

0000300 DVR one channel

Digital video recorder with one camera input and one video output

- Can be used with a compact camera (4p) or serial camera (7p)
- Video loop function
- Automatic timestamp
- Including 32GB SDHC-card for max 72 hours of storage and SD-card reader

0665060 SD-card 128GB

8975850 Power cable

Switchers

Input and power supply for three cameras and in combination with a Y-split cable: four cameras.

- Cameras can be switched over automatically or manually

0404040 Switcher UNI

- Waterproof IP54 according to IEC 60529
- 4p output for monitor

0404080 Switcher UNI IP67

- Waterproof IP67 according to IEC 60529
- 4p output for monitor

0404060 Switcher Serial IP67

- Waterproof IP67 according to IEC 60529
- 7p output for monitor
- Only in combination with a Serial monitor

0000250 DVR Multi view

Digital video recorder with four camera inputs and one video output with multiview options.

- Suitable for compact cameras (4p)
- Automatic timestamp
- Including 128GB 80 MB/s SDXC-card for max 72 hours of storage

0000260 DVR 4CAM

Digital video recorder with four camera inputs and four video outputs.

- Suitable for compact cameras (4p)
- Including 128GB 80 MB/s SDXC-card for max 72 hours of storage

Video distributors

- For connecting a second monitor.

0407070 Video distributor 1 in - 2 out

- Including 0,2m cables and 4p connectors

0407090 Video distributor 1 in - 2 out, Serial

- Including 0,2m cables and 7p connectors

0407001 Video distributor 1 in - 3 out

For connecting a second and third Orlaco monitor.

- 7-32 V/DC
- Cables and connectors are not included

Video control unit

0504730 Orlaco Smartbox

For connect and control the Orlaco AF-Zoom camera, Pan & Tilt and TIC camera.

- IP67
- Stainless steel housing

Spectrum Scanner wireless video transmitter & receiver

- Including powercable and two adjustable brackets for transmitter and receiver
- 8 video channels
- Full On Screen Display (OSD) functionality for system settings
- Please contact your dealer for further advice

0004061 RoundMax 150

- Omnidirectional antenna with horizontal orientation
- Maximum range 150m (dependent on surroundings)

0004091 LineMax 300

- Directional antenna with vertical orientation
- Maximum range 300m (dependent on surroundings)

Junction Box

0504840 Junction Box AF-Zoom/PTZ

- For use with AF-Zoom and Pan & Tilt cameras
- 10p

Power supply

0004601 Power supply 9-36V

- Maximum cable length 200m
- Power input 9-36V/DC
- Power output 12V/DC

Pan & Tilt

0507091 Pan & Tilt Heavy Duty

- IP68
- Aluminium housing
- 24V/DC
- Weight 2,3kg
- Pan speed 30° per sec, tilt speed 6° per sec

0507040 Pan & Tilt max 12kg

- IP68
- Aluminium housing
- 24V/DC
- Weight 6,5kg
- Pan speed 32° per sec, tilt speed 12° per sec

0507100 Mounting plate Pan & Tilt

For quick mounting of camera on Pan & Tilt unit.

Control

0503500 Control unit Pan & Tilt

Power supply and control for Pan & Tilt unit (0507061).

- Joystick (0506500) is required
- Power input 24V/DC
- Aluminium housing

0506500 Joystick

- Built-in
- Operating temperature between -30°C to +75°C
- IP40
- Telemanique

0502650 Handheld control AF (serial)

For activating of the Pan & Tilt / AF-Zoom / TIC camera.

- 7 pins
- Zoom function
- Including 5m power supply cable

0502620 Control panel mount

Built-in keyboard for activating of the Pan & Tilt / AF-Zoom / TIC camera.

- Joystick (0506500) are not included
- Power input 24V/DC
- Dimensions: 140x116x80mm

ISO Certifications

All Orlaco products are manufactured according to the latest Quality Management System Standards:

IATF 16949 : 2016

ISO 9001 : 2015

Additionally, all Orlaco products are manufactured according to the latest *Environmental Management System Standard*:

ISO 14001 : 2015

Type-Approval Certifications

Regulations 10 and 46 are used to determine the Type-Approval for **EMC** and **Indirect Vision** (Mirror Directive). **R46** describes mirror specifications for truck compliancy. Orlaco Frontview systems meet all these requirements. **R10** describes the **EMC** behavior of the Orlaco Camera and Monitor systems.

TÜV Automotive Certifications

The European Agreement concerning the International Carriage of Dangerous Goods by Road (**ADR**) demands additional equipment. Orlaco Camera and Monitor systems and connection cables comply with these regulations.

Compliance

Our Camera and Monitor systems are produced entirely in line with the **CE-marking** and the most recent applicable directives and product standards (e.g. **EMC**, **FCC**, **Machinery**, **R&TTE**). Orlaco products are compliant with **RoHS** and **REACH**.
